ABG Motors: Japan vs. India Market Research Analysis

This report outlines the market analysis for ABG Motors, comparing customer data and purchasing behavior between the Japanese and Indian markets. The insights are derived from two primary datasets: JPN Data.xlsx - CN_Mobiles and IN_Data.xlsx - IN_Mobiles.

This model achieved an overall accuracy of 66.47% on the Japanese test dataset,with a higher tendency to miss actual buyers (1,610 false negatives) than to falsely predict them (1,071 false positives).

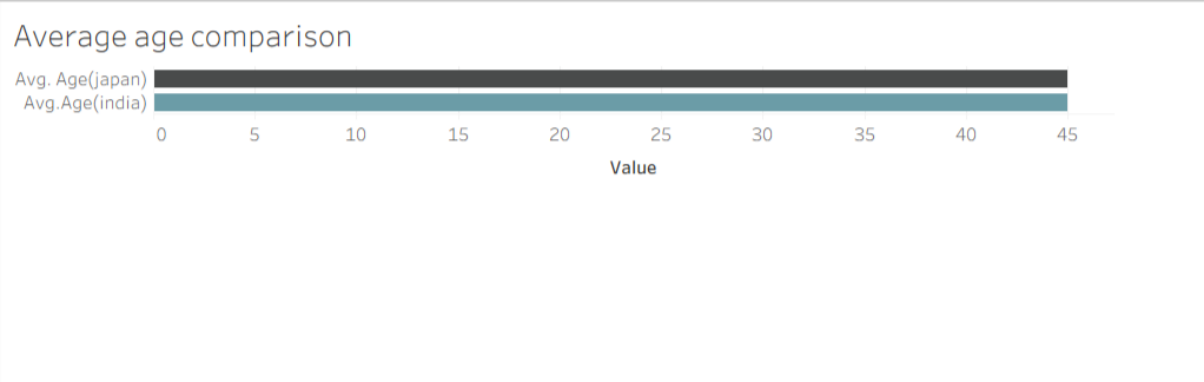

It demonstrates a precision of 73.67% and a recall of 65.05% for predicting purchases ,indicating that while its positive predictions are reasonably reliable,it fails to capture over a third of actual customers.

This ROC curve demonstrates fair overall classification performance with an AUC of 0.72,indicating that the model performs moderately better than random guessing.

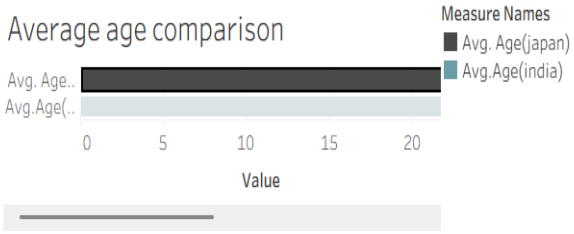

```
--- Indian Market Sales Forecast ---
Total Sample Size analyzed : 70,000
Predicted Potential Buyers : 44,307
Predicted Conversion Rate  : 63.30%
Target Sales Threshold     : 12,000

DECISION: GO - Predicted sales (44,307) EXCEED the minimum threshold of 12,000 units.
